Course Title : **Project Work**

Objectives

To manifest the students to understand the importance of experimental analysis, problem solving through a scientific approach related to the environment and society and to educate and train the students to write scientific papers.

Description:

Each faculty member will be served as a guide for a group consisting of 3-5 students. A specific problem will be assigned to the students, or they will be asked to choose a problem/area of interest. The research work can be carried out at the college or any other organization approved by the guide and HOD. The internal and external examiners panel, including HOD, will conduct viva-voce. The group of students will explain their project through PPT before the panel members. Internal and external evaluation will be based on the student's performance.

Methodology

Each project should contain the following details:

- ❖ Introduction on the topic
- ❖ Experimental details
- ❖ Result and Discussion - Enclosure of figures and tables
- ❖ Conclusion
- ❖ Reference
