COURSE PLAN

CLASS: I MCA SEMESTER: II ACADEMIC YEAR: 2020 - 2021

STAFF NAME: R. RAGUPATHY

SUBJECT: Web Programming (PHP & MySQL) SUBJECT CODE: 20PCA2CT05

Objective:

Unit - I	Understand about Server Side Scripting Language in PHP & MySQL
Unit - II	Understand the Concept of Arrays, working with files and directories, working with database and SQL
Unit - III	Understand the needs of AJAX, Script in web programming languages in PHP
Unit - IV	Understanding the needs of Jquery in web programming
Unit - V	Understanding the Concept of MVC frame work using YII in PHP.

Outcome:

Unit - I	Understanding the Concept of Server side Scripting language PHP & MYSQL
Unit - II	Ability to write Code in PHP and Save the data into the MySQL database table
Unit - III	Ability to understand the functional dependencies of AJAX in PHP
Unit - IV	Ability to understand the needs of JQuery in PHP
Unit - V	Ability to understand about MVC framework using YII in PHP.

CLASS: MCA SEMESTER: I Sem ACADEMIC YEAR: 2020 - 2021

STAFF NAME: Dr. M. Chandran

SUBJECT: Object Oriented Programming with C++ SUBJECT CODE: 20PCA1CT01

Objective:

Unit - I	Understand Object oriented programming and advanced C++ concepts.
Unit - II	Be able to explain the difference between object oriented programming and procedural programming.
Unit - III	Be able to program using more advanced C++ features features such as composition of objects, operator overloads, dynamic memory allocation, inheritance and polymorphism, file I/O, exception handling etc.
Unit - IV	Be able to build C++ classes using appropriate encapsulation and design Principles.
Unit - V	Improve your problem solving skills.

Outcome:

Unit - I	Distinguish between Structured and object-oriented problem Solving approaches and apply them based on the problem given.
Unit - II	Identify classes and objects from the given problem description and able to create classes and objects using C++.
Unit - III	Improve Secured data processing by applying Abstraction and able to create classes and objects using Encapsulation & Information hiding.
Unit - IV	Achieve code reusability and extensibility by inheritance and polymorphism.
Unit - V	Apply the concepts of files and Stream classes.

Objective:

Unit - I	To understand about C Language, Basic Structure, History, Data types, Declarations, Operators, Input and Output Statements.
Unit - II	To learn about Decision Making and branching Statements. To understand about Arrays, Types of Arrays, Character Array and Strings.
Unit - III	To understand about user defined functions, Category of functions, Recursion, the Scope and life time of Variables.
Unit - IV	To understand about Structure and union, pointers, declaration and usage.
Unit - V	To understand about file Management in C.

Outcome:

Unit - I	Students have learned about the C Language, basic structure, Data types, operators, Input and output statements
Unit - II	Students have learned about decision making and branching statements, Arrays, Types of arrays Character Arrays & Strings.
Unit - III	Students have learnt user defined functions, Category of functions, Recursion, Scope.
Unit - IV	Students have learnt about Structures, Union, Pointers
Unit - V	Students acquired knowledge on filemanagement in C.

SUBJECT: object oriented Progs with C++ SUBJECT CODE: 2C02

Objective:

Unit - I	To Know about Data types. To Understand OOP concept. To Know the benefits and Applications of OOP
Unit - II	To Understand Varios function types. To Know function Overloading To Understand Constructors
Unit - III	To Know the Concept of Overloading To Know Operator Overloading. To understand Inheritance concept.
Unit - IV	To understand. Pointers & files. To Know about Virtual functions.
Unit - V	To understand the Concept of Generic programming To Know about Templates & Exceptions.

Outcome:

Unit - I	Students will be able to * Implement the concepts of OOPS. understood the OOO Paradigm.
Unit - II	Implement Inline () Implement function Overloading Concepts.
Unit - III	Implement Operator Overloading Concepts. Implement Inheritance Concepts.
Unit - IV	* Apply the concept of files. * Apply the concepts of pointer to implement virtual functions.
Unit - V	* Implement Generic programming through Templates * Implement Exception Handling Concepts.
