CCNA Routing and Switching: Routing and Switching Essentials

During the Cisco Networking Academy® course, administered by the undersigned instructor, the student was able to proficiently:

- Understand and describe basic switching concepts and the operation of Cisco switches

- Understand and describe enhanced switching technologies

- Understand and describe dynamic routing protocols, distance vector routing protocols, and link-state routing protocols

- Configure and troubleshoot basic operations in a small switched and routed network

- Configure and troubleshoot VLANs and inter-VLAN routing

- Understand and describe the purpose and types of access control lists (ACLs)

- Configure, monitor, and troubleshoot ACLs for IPv4 and IPv6

- Understand and describe the operations and benefits of Dynamic Host Configuration Protocol (DHCP) and Domain Name System (DNS) for IPv4 and IPv6

- Understand and describe the operations and benefits of Network Address Translation (NAT)

- Configure and troubleshoot NAT operations

Certificate of Course Completion

CCNA Routing and Switching: Routing and Switching Essentials

The student has successfully achieved student level credential for completing CCNA Routing and Switching: Routing and Switching Essentials course administered by the undersigned instructor. The student was able to proficiently:

- Determine how a router will forward traffic based on the contents of a routing table.
- Explain how switching operates in a small to medium-sized business network.
- Use monitoring tools and network management protocols to troubleshoot data networks.
- Configure monitoring tools available for small to medium-sized business networks.

- Configure initial settings on a network device.
- Configure Ethernet switch ports.
- Implement VLANs.
- Implement static routing and RIPv2.
- Implement DHCP on a router.
- Implement network address translation (NAT).
- Implement access control lists (ACLs) to filter traffic.
